**Are you keen to learn more about how you
can maximise your Home's Energy
Efficiency?**

JOIN US- Reserve a seat today !!

LINCOLN ENVIRO TOWN is planning a tour of homes in this region to enable interested visitors to learn and experience from the users, the benefits, the advantages, the pitfalls, the costs and the savings achieved, by adding these factors into their home design and their living environment.

We will visit a variety of homes showing energy saving aspects such as older homes with **retrofitted insulation** , **solar water heating**, or homes designed to be energy efficient and homes **generating their own electricity** and or **other efficient systems** such as **wind power**, **passive heat retention**, **double glazing**, **internal heating**.

Most people enjoy visiting other people's homes and finding out how they are reducing energy costs, doing their bit to reduce their carbon footprint. **Are you one of these homeowners who is keen to find out more about what benefits you can achieve by implementing some of these strategies?**

The selected Energy Efficient home owners, will be able to showcase their features and discuss the success or otherwise with those who want to gain the knowledge – our bus tour guests will be on site at these homes anywhere from **15 -30 mins to look around** and have the opportunity to listen and talk to these home owners about any relevant information offered and presented in an informal casual setting... Beats getting the "sales pitch" from the sales person!- and lets prospective purchasers of these energy saving features experience firsthand from the satisfied owners.
